

The text 'Experience Centric Practical Solutions' is displayed in a white, sans-serif font. The words are arranged in two lines: 'Experience Centric' on the top line and 'Practical Solutions' on the bottom line. The text is enclosed within a thin, orange, rounded rectangular border that follows the shape of the words.

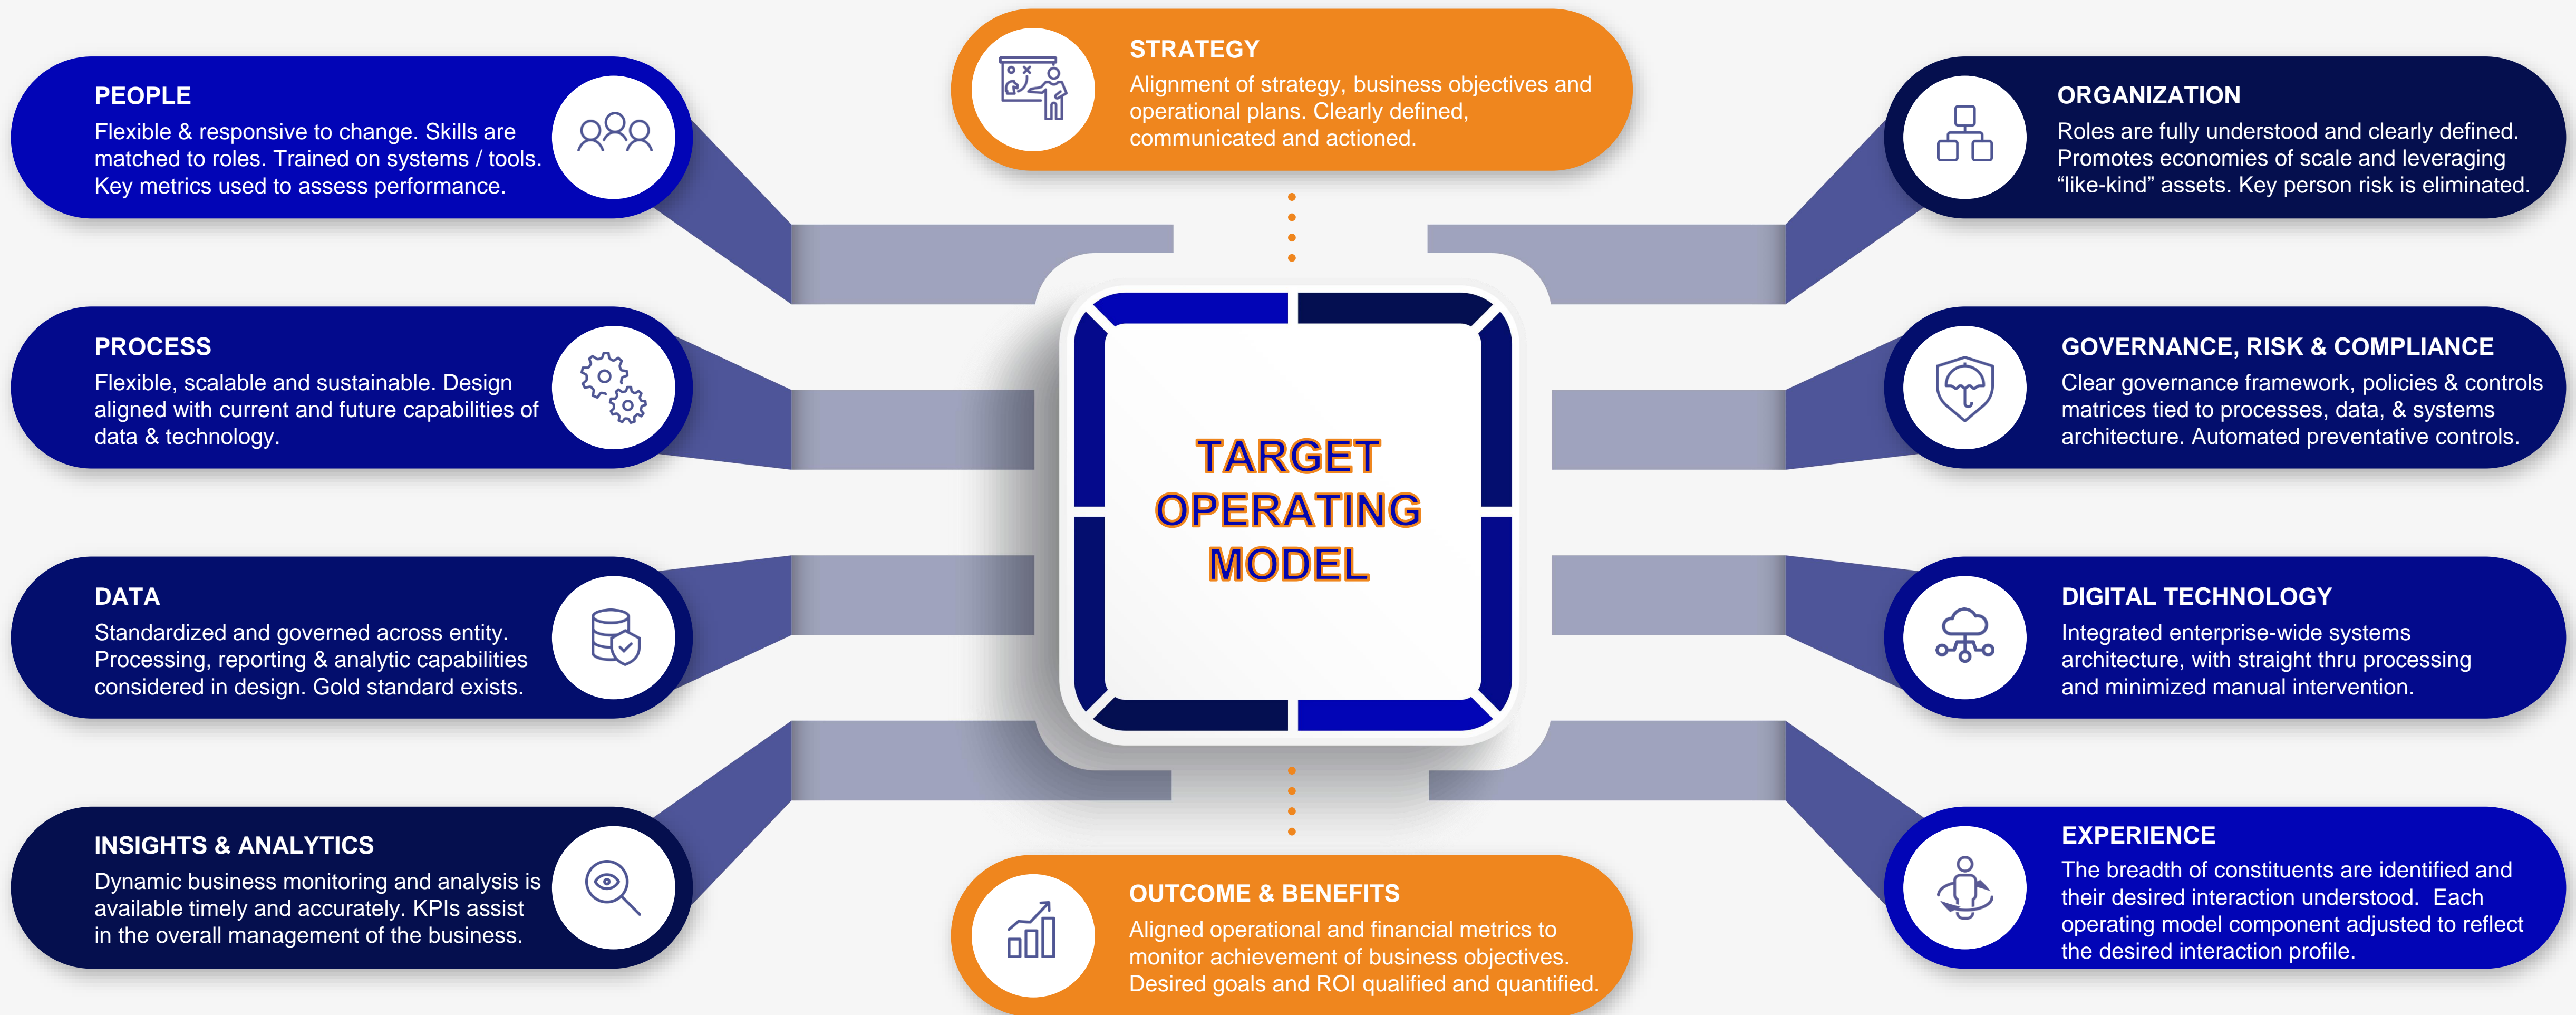

Service overview – Finance function modernization

The Finance function modernization goal is to create an integrated and scalable Finance function that efficiently delivers value-added services to stakeholders. Specific operating model components can be targeted for improvement, or efforts can be encapsulated in a broader transformation program to achieve desired results.

Finance value creation is dependent on target operating model (TOM) balance

The Target Operating Model (TOM) serves as a framework for each of our solutions: *Operating Model Strategy*, *Finance Function Modernization*, and *Program Risk Control (PRC)*. The TOM is a critical tool that is used to analyze the Finance function from a holistic perspective.
